

How to Start or Stop applications if you get a com port conflict with Diamond Link

- Right Click **“My Computer”**
- Select **“Manage”**
- Select **“Service & Applications**
- Select **“Services”**
- Find Application that may be using Com port, for example **“DiamondLink”** in the list of applications
- Right Click on **“DiamondLink”**
- Select **“Stop”**
- Need to select **“Start”** to restart the application
